

Deri O Huiginn

Senior Frontend Engineer · React, Vue, Design Systems & Performance

Valencia, Spain (Remote · EMEA) | deriohig@gmail.com

deriohig.github.io | linkedin.com/in/deri-o-huiginn

Senior Frontend Engineer with 8+ years building high-quality, accessible UIs for B2B SaaS platforms in logistics and enterprise security, currently the most senior frontend engineer on the team. Led a Vue 2→3 migration serving 30,000 users across 172 countries with zero production regressions, cutting bundle size roughly 20%, and drove Carbon Design System and WCAG 2.1 AA adoption across two enterprise product lines.

TECHNICAL SKILLS

- **Frontend:** JavaScript/TypeScript (ES2022+), React, Redux, React Query, Next.js, Vue, Nuxt.js, HTML, CSS/SCSS
- **Design Systems & UI:** Reusable component libraries, design systems, Storybook, Carbon Design System, Figma, responsive UI
- **Accessibility & Performance:** WCAG 2.1 AA (a11y), Core Web Vitals (LCP/CLS/INP), bundle optimisation (Webpack, Vite)
- **Testing:** Jest, Playwright, Testing Library (unit, integration, E2E)
- **Platform & Tools:** Node.js, RESTful APIs, CI/CD, Git/GitHub, Sentry
- **Technical Leadership:** Mentoring & guild onboarding, code reviews, frontend architecture, technical sponsorship & design documents, cross-functional collaboration (Product, Design, Backend), AI-assisted delivery (Claude Code, MCP, Figma MCP)

PROFESSIONAL EXPERIENCE

cargo.one GmbH – Valencia, Spain (Remote)

Aug 2021 – Present

Senior Frontend Engineer

- Led the Vue 2→3 migration of the core booking platform in 4 months with zero production regressions, personally authoring the majority of code changes; combined with dependency pruning and a move to Vite, cut production bundle size roughly 20% and unlocked TypeScript, Composition API, and modern tooling across a codebase serving 30,000 users in 172 countries
- Shipped a white-labeling add-on now live for its first customers, designing it as an isolated, modular frontend architecture with clean integration boundaries instead of a full rebuild
- Architected the unit-conversion and dynamic-pricing layer (kg/lbs, real-time carrier rates): designed the client-side data model and caching strategy used across booking surfaces, coordinating frontend, backend, product, and design to deliver the multi-system feature
- Instrumented end-to-end product analytics (Heap, FullStory, Sentry) across the booking funnel, surfacing UI errors and drop-off points that drove reliability and UX improvements to the booking flow
- Write design docs that scope complex frontend initiatives and break them into ticket-level plans, aligning delivery with product and design priorities
- As the team's most senior frontend engineer, run cross-team frontend guild sessions coaching mid-level and senior engineers on frontend architecture and engineering practices
- Built AI-assisted development workflows (Claude Code, MCP) now used by other engineering teams

IBM Security Guardium – Dublin, Ireland

Jul 2018 – Aug 2021

Front End Developer

- Acted as frontend technical lead, owning React UI architecture and code-review standards for a 9-engineer team, mentoring the team while building GDPR/HIPAA-regulated compliance and anomaly-detection products
- Designed and shipped the visual rule builder behind Guardium alerting: a drag-and-drop React editor compiling user-defined conditions into detection rules, letting customers author security alerts without engineering involvement

- Built a WCAG 2.1 AA React component library adopted by two enterprise security products, replacing duplicated per-product UI with reusable, accessible components and accelerating delivery of new screens
- Drove Carbon Design System adoption across the Dublin engineering org via a 3-day onboarding workshop for 30 engineers, standardising components across both Guardium products

Earlier Experience — 2016–2017

Full Stack Developer at Scholar GPS (Los Angeles): built PHP/MySQL academic research portals. Full Stack Developer at Software Design Ltd (Dublin): built component-based WordPress frameworks for finance and credit-union clients

2017–2018: Travelled through Asia before relocating from the US to Ireland

EDUCATION

Dún Laoghaire Institute of Art, Design and Technology (IADT)

Dublin, Ireland

- BSc (Hons), Computing in Multimedia Systems / Web Engineering — First Class Honours, 2016
